

# THE PERSONALITY DISORDERS

## A New Look at the Developmental Self and Object Relations Approach

James F. Masterson, M.D.

"A brilliant account of an exceptionally effective treatment approach by a masterful theorist, clinician, and writer. Case examples and treatment directives are cogent and compelling. If you treat personality-disordered individuals in your practice, you must read this book."

Len Sperry, M.D., Ph.D., author of *Handbook of Diagnosis and Treatment of the DSM-IV Personality Disorders*

In this extraordinary book, James Masterson gives new meaning to "back to the future" as he reviews some of the most significant ideas he set forth a quarter of a century ago and wonders out loud how they will cross over into the new millennium. Most have stood the test of time and indeed will serve as a strong foundation for the work that is to come; some have gone through a healthy evolution and remain more fluid. All continue to hold our interest and to demand our attention.

Among the featured topics:

- the role of the mother or primary caretaker in the development of the normal self
- the minimizing and denial of the role of the mother in the borderline personality disorder
- handicaps of the DSM-IV descriptive approach to diagnosis and the advantage of a psychodynamic approach
- the integrating influence of a concept of the self on an understanding of the personality disorders
- the differential diagnosis of those patients whose primary defense is focus on the object
- the diagnosis and treatment of intimacy problems in patients with personality disorders

A unique highlight is the inclusion of a comprehensive report of a six-year course of psychoanalytic psychotherapy of a patient with a closet narcissistic defense against neurosis. This rich case study makes accessible not only the overt clinical issues being negotiated, but also the all-important nuances of disclosure and treatment.

## Closet Narcissistic Disorder: The Masterson Approach

"Dr. Masterson draws his original therapeutic approach from a thorough understanding of developmental theory within the self- and object-relational perspective. In this video, which reenacts the treatment of a typical case of 'closet narcissism,' we are offered a rare, inside look at an experienced clinician at work. We see Masterson explicate his theoretical base into concrete, moment-to-moment clinical observations, interventions, and technical suggestions. A most valuable teaching tool!"
